Petition Request

We the undersigned request that Council give consideration to*:

Acknowledging that many Shire residents are concerned regarding the safety of the mRNA COVID-19 vaccines (including scientific reports of DNA contamination issues) and the growing number of people reporting serious harms as a result of being injected with these substances, and that Council:

1. Take the same steps as Port Hedland in advising local medical practitioners and medical centres to suspend such vaccinations until further investigation into the findings; and

2. Seek urgent answers from the Prime Minister regarding contamination of COVID-19 vaccines.
